GO BP enrichment: downregulated genes
monocarboxylic acid metabolic process
small molecule biosynthetic process
purine−containing compound metabolic process
ribonucleoprotein complex biogenesis
nucleotide metabolic process
ribosome biogenesis
generation of precursor metabolites and energy
energy derivation by oxidation of organic compounds
small molecule catabolic process
cytoplasmic translation
fatty acid metabolic process
cellular respiration
rRNA metabolic process
aerobic respiration
carboxylic acid biosynthetic process
organic acid biosynthetic process
nucleoside phosphate biosynthetic process
rRNA processing
organic acid catabolic process
carboxylic acid catabolic process
amino acid metabolic process
ribosomal small subunit biogenesis
oxidative phosphorylation
electron transport chain
respiratory electron transport chain
ATP synthesis coupled electron transport
mitochondrial ATP synthesis coupled electron transport
dicarboxylic acid metabolic process
aerobic electron transport chain
ribosomal large subunit biogenesis
