KEGG enrichment: upregulated genes
Pathways in cancer
Cytokine−cytokine receptor interaction
Epstein−Barr virus infection
NOD−like receptor signaling pathway
Herpes simplex virus 1 infection
MAPK signaling pathway
Lipid and atherosclerosis
Kaposi sarcoma−associated herpesvirus infection
Influenza A
Human cytomegalovirus infection
Shigellosis
TNF signaling pathway
JAK−STAT signaling pathway
Chemokine signaling pathway
Tuberculosis
Measles
Transcriptional misregulation in cancer
NF−kappa B signaling pathway
Hepatitis C
Viral protein interaction with cytokine and cytokine receptor
Necroptosis
IL−17 signaling pathway
Toll−like receptor signaling pathway
C−type lectin receptor signaling pathway
Rheumatoid arthritis
Cytosolic DNA−sensing pathway
Legionellosis
Pertussis
RIG−I−like receptor signaling pathway
p53 signaling pathway
