response to type II interferon
regulation of extrinsic apoptotic signaling pathway
negative regulation of viral process
negative regulation of viral genome replication
regulation of apoptotic signaling pathway
negative regulation of extrinsic apoptotic signaling pathway
cellular response to interleukin−1
small molecule biosynthetic process
extrinsic apoptotic signaling pathway
defense response to virus
regulation of innate immune response
response to virus
positive regulation of cytokine production
regulation of inflammatory response
positive regulation of inflammatory response
leukocyte proliferation
cellular response to molecule of bacterial origin
cellular response to lipopolysaccharide
positive regulation of defense response
leukocyte migration
response to lipopolysaccharide
cytokine−mediated signaling pathway
response to molecule of bacterial origin
response to tumor necrosis factor
response to toxic substance
positive regulation of canonical NF−kappaB signal transduction
cellular response to biotic stimulus
response to alcohol
cytoplasmic translation
response to ketone
