GO BP enrichment: downregulated genes
dicarboxylic acid metabolic process
fatty acid metabolic process
amino acid metabolic process
organic acid biosynthetic process
organic acid catabolic process
small molecule biosynthetic process
carboxylic acid catabolic process
carboxylic acid biosynthetic process
small molecule catabolic process
monocarboxylic acid metabolic process
purine−containing compound metabolic process
nucleoside phosphate biosynthetic process
cellular respiration
aerobic respiration
energy derivation by oxidation of organic compounds
ATP synthesis coupled electron transport
nucleotide metabolic process
generation of precursor metabolites and energy
mitochondrial ATP synthesis coupled electron transport
oxidative phosphorylation
aerobic electron transport chain
respiratory electron transport chain
electron transport chain
cytoplasmic translation
ribosome biogenesis
ribonucleoprotein complex biogenesis
ribosomal small subunit biogenesis
ribosomal large subunit biogenesis
rRNA processing
rRNA metabolic process
